

AIM RetroReflective Target Tape

Photogrammetry tapes with custom, non-staining adhesive

AIM target tape is custom-coated with a strong, non-staining adhesive to allow for clean removal from most surfaces - even after weeks. The top coating is a matte finished polyester, extending over the retroreflective, with the same custom adhesive.

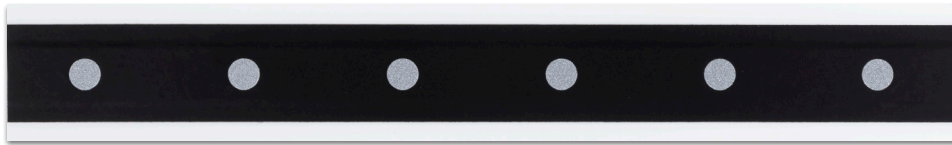

STRAIGHT & CONTOURED SURFACES

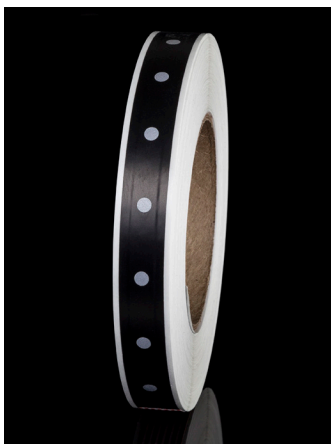

AIM retroreflective target tape products are made with 3M .005" thick retroreflective material that works well on straight, as well as contoured surfaces.

NO PRE-MASK OR POST-CLEANUP

AIM target tape is custom-coated with a strong, non-staining adhesive to allow for clean removal from most surfaces - even after weeks. The top coating is a matte finished polyester, extending over the retroreflective, with the same custom adhesive. No pre-masking or post process cleanup is required.

Product Construction

Specifications

Roll Length:	50 yards
Base Material:	Retroreflective/Polyester
Adhesive:	Custom non-staining acrylic
Liner:	53# White densified paper
Total Thickness:	6.5 mils.
Finish:	Matte black surrounding the required target diameters
Service Temperature:	-10 to 165° F

Note: Apply and store in ambient temperature
